David Boulton,  
Readtronics  
955 Market Suite 530  
San Jose, CA 95113

Dear Mr. Boulton,

In early December, I was fortunate to attend a two-day conference on the Cupertino Model Presented by Barbara Caligiuri. The tape - 'The Information Age Made Personal' was shown which allowed us to view the current technology of the Electronic Book.

I teach fifth grade and am the Computer Coordinator in Stratham, NH. The use of technology in areas other than just computers interests me. I found the concept of the Electronic Book fascinating as well as its implications.

Please consider this letter as a show of support in the project, as well as a request for detailed information on the concept itself. I will be sharing this information with my class. Thank you.

Sincerely,

*Craig Siulinski*
